Alleviate **pain points**; Drive business up and to the right

Labor challenges

Actabl optimizes labor by expertly matching team members and shifts to exact property demand, freeing up managers' time and limiting costly overtime and contract labor.

Overwhelmed by data

Actabl enables fast decision-making with normalized data analytics and consolidated business performance leadership dashboards, while providing easy-to-follow and actionable insights to managers.

Cost overruns from aging assets

Aging assets have an increased risk of failure, resulting in out-of-order rooms and large unbudgeted expenses. Actabl empowers engineering teams to extend asset life and increase the predictability of CapEx.
